

New from Harvia!

Harvia Kivi and Harvia Legend

Harvia Kivi and Harvia Legend electric sauna heaters offer a luxuriously strong sauna experience. The uniqueness of the heat is based on the strength of the stone and the power of the Finnish sauna tradition. You can adjust the nature of the heat from soft to sharp by throwing water either to the side of the heater or straight on top of the stone pillar. The heaters offer an enjoyably humid sauna bath even at a moderately low temperature and the warmth lingers long between the stones.

HARVIA
Natural well-being.

"Kivi" is a Finnish word and means "stone".

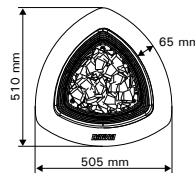

Harvia Kivi – Vitality from primitive strength.

Harvia Kivi electric heater produces a traditional soft sauna bath in a modern way. This floor mounted heater model has nearly 100 kg of sauna stones, which is proved to be the correct amount to offer a vigorous heat within a reasonable time. The stones are located in a two-part, triangular steel frame. This stylish and distinguished design makes room for the natural strengths of the stone.

Harvia Kivi can be located near the benches for its surface temperature is relatively low. You can also embed the heater to the lower bench with the help of an embedding flange made from stainless steel.

Harvia Kivi heater (models PI70 and PI90) is equipped with a separate digital control panel that can be located in or outside the sauna with a connecting cable. The length of the cable is 3 m (with 5 m or 10 m as options). The control panel makes use easier and enables you to adjust the temperature to an accuracy of one degree. Harvia Kivi models PI70E and PI90E are controlled with a separate control unit (for example Harvia Griffin, Harvia C150 and Harvia Fenix).

Measurements of the embedding flange (accessory)

Harvia Legend – The mighty original.

Harvia Legend gives you the ultimate sauna experience. This large heater takes you back to the origins – it entails the essence of the sauna. The rustic steel frame has 300 kg of stones inside and as they heat up, even a bigger sauna gets a magnificent sauna bath. Due to the open structure of the stone space, you can throw water on the entire outer surface of the heater. The heat charged in the large number of stones allows you to throw more water even at a lower temperature – you'll get a delightfully moist bathing

experience. The heater provides ample heat long after it has been switched off.

Due to the symmetric circular form, the Harvia Legend heater can be installed to the middle of the sauna or embedded to the benches. The heater is operated through a separate control unit (for example Harvia Griffin, Harvia C260 and Harvia Fenix). Legend models P011 and P0165.

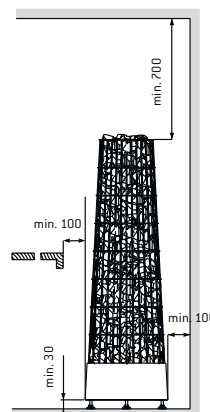

Technical Data

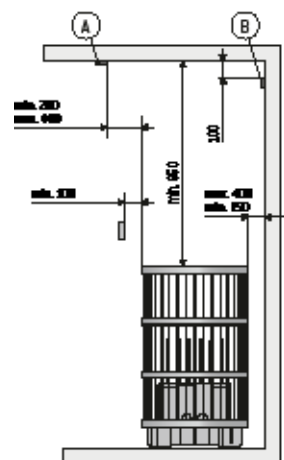

Heater model	Output kW	Size of the sauna room min.-max.	400 V 3N~ connecting cable mm ²			Fuse A
			To control unit mm ²	To heater mm ²	To sensor mm ²	
		min. height mm				
PI70, PI70E	6,9	6–10 m ³	5 x 1,5	4 x 0,25	6 x 0,5	3 x 10
PI90, PI90E	9	8–14 m ³	5 x 2,5	4 x 0,25	6 x 0,5	3 x 16
		min. height mm				
P011	11	9–24 m ³	5 x 2,5	5 x 2,5	4 x 0,25	3 x 16
P0165	16,5	16–35 m ³	5 x 6,0	5 x 2,5	4 x 0,25	3 x 25

PI heater dimensions: width 370 mm, depth 370 mm, height 1200 mm and weight 15 kg. Stone capacity ca 100 kg.
P0 heater dimensions: diameter 600 mm, height 1030 mm and weight 35 kg. Stone capacity ca 300 kg.
